

# ESG Reporting Tool

## Let the Environmental, Social and Governance (ESG) Reporting Tool take care of the data

### Board-level decisions

- Reliable and robust data, compared against industry benchmarks to give confidence in decision making
- Aggregated group-level and segment breakdown specific to your business, for example covering different locations or industries
- Data analytics on year-on-year trends and progress against targets

### Compliance, investor relations and corporate communications

- Built-in stakeholder engagement and materiality assessment and results
- User-friendly and bilingual dashboards available at any time for communications with stakeholders
- Signposting for listing rule requirements and broader indicators

### Example use case

- HKEx listing rule upgrades on ESG disclosures effective for financial years commencing on or after 1 July 2020
- Mandatory 'comply or explain' disclosures broadened e.g. including board oversight responsibilities and climate change exposure details
- Tool helps to collect, analyse and convert your data for general disclosures and key performance indicators
- ESG report generated to address stakeholder expectations

### Challenges from clients

'We need to allocate a lot of manpower to collect and consolidate ESG data each year'

'We are unsure of the completeness and quality of our ESG data'

'We don't understand what our ESG data mean to us and our key stakeholders'

### Key features

- User-friendly interface for data input
- Simultaneous user access from multiple locations
- Collection of qualitative and quantitative ESG data
- Technology-enabled real time monitoring of project workflow
- Data validation and consolidation
- Audit trail of data to assess reporting boundaries and facilitate ESG data assurance
- Conversion of raw data into key performance indicators (KPIs) for disclosure using latest conversion factors
- Generate a customised ESG report
- Visualise data trends in an interactive dashboard with KPIs tailored to your business
- Facilitate benchmarking ESG performance against industry average

### Key benefits

- Streamlined and reliable data collection processes for ESG report preparation
- Centrally maintained data, transparent and sharable with multiple users across the business
- Raw data conversion into KPIs for disclosure
- Auditable and verifiable outputs to boost confidence in accuracy of ESG report
- Timely, readily available and analysed ESG data for communications with stakeholders
